Profile

I'm a dedicated third-year undergraduate student pursuing a degree in **Statistics & Computer Science**, with a strong passion for **software engineering and full-stack development skills**. Experienced in building scalable web apps, APIs, and enterprise-level systems. Passionate about solving real-world problems through efficient software design and cloud technologies

Whether it's analyzing data, building web applications, or creating robust backend systems, I'm always eager to learn and take on new challenges. I'm actively seeking a **Software Engineering Internship** where I can apply my skills, gain practical experience, and contribute to impactful, data-driven solutions.

Education

University of Kelaniya, Sri Lanka Bachelor of Science in Statistics & Computer Science	2023 – 2026
University of Colombo School of Computing, Sri Lanka Bachelor of Information Technology — Completed Diploma in IT	2023 – 2026
Rahula College, Matara G.C.E. A/L (Physical Science Stream): 1B, 2Cs — G.C.E. O/Ls: 6As, 3Bs	2007 – 2021

Projects

Fraud Detection App using Graph Neural Networks (GNNs) [Live Demo](#)
Built a fraud detection system using GraphSAGE (GNN) with a Streamlit web app for manual & bulk CSV predictions. Features include interactive visualizations (histogram, ROC curve, confusion matrix) and downloadable results.
Technologies: Python, PyTorch, Streamlit, Pandas, Seaborn, Matplotlib, NumPy, GNNs

Epic Talk – Podcast Website [Live Website](#)
Designed and developed the official website for Epic Talk, a science-focused podcast platform. The site features engaging sections like psychology talks, university playlists, live discussion registration, and listener feedback.
Technologies: HTML, CSS, JavaScript, PHP, MySQL, Bootstrap

Inventory Management System [Live Website](#)
Developed Inventory Management System in C# & SQL Server that reduced manual entry by 50% and supported 1,000+ transactions per month. This system helps businesses efficiently manage Products, Suppliers, Customers, and Sales, with features like User authentication & login, Product & Supplier management, Sales & order tracking, Reports & analytics
Technologies: Visual Studio, SQL, Windows Server Management Studio, C#

HighwayLink – Smart Highway Ride Sharing Platform [GitHub Repository](#)
Developed a platform that uniquely enables normal vehicle owners to earn extra income during their daily rides, promoting cost-efficient and eco-friendly travel. Built responsive, interactive dashboards for users and admins, implemented secure authentication, and Features dynamic seat management. Includes inquiry & support system, FAQs with a modern, responsive UI.
Technologies: Spring Boot, React, Node.js, Express.js, MongoDB, RESTful APIs, Tailwind CSS, JWT Authentication, Axios, Vite

Sentiment Analysis Web App

[Live Demo](#)

Developed a web application using Streamlit and NLTK, trained ML model to classify text sentiment, Integrated seaborn and matplotlib for data visualization, improving insights.

Technologies: Python, Streamlit, NLTK, NLP, Scikit-learn, Seaborn, Matplotlib, Pandas

Retail Sales Forecasting & Customer Analytics (MLOps Project)

[Live Demo](#)

Designed an MLOps pipeline for retail sales forecasting using XGBoost, MLflow, and an automated Airflow DAG. Dockerized a FastAPI app and deployed an interactive Gradio interface on Hugging Face, enabling business users to input store details & view predictions with live metrics (RMSE, MAE, R^2) and visual graphs.

Technologies: Python, Pandas, SQL, Scikit-learn, XGBoost, MLflow, FastAPI, Airflow, Docker, Gradio

Time Series Sales Forecasting Dashboard – Power BI

[Live Dashboard](#)

Designed and developed an interactive Power BI dashboard by cleaning retail sales data, applying built-in time series forecasting, and visualizing key metrics with filters, drill-throughs, and KPIs for dynamic trend analysis and presentation.

Technologies: Power BI, DAX, Data Cleaning, Forecasting Analytics

Technical Skills

- **Programming:** Python, Java, Javascript, C, R, C#
- **ML Frameworks:** TensorFlow, PyTorch, Scikit-learn, Airflow, MLflow
- **Databases:** MongoDB, MsSQL, MySQL Workbench
- **Web Development:** HTML, CSS, Node.js, PHP, Bootstrap, Tailwind-CSS, React, Spring Boot, FastAPI, Flask
- **Cloud & DevOps:** Docker, GitHub, AWS
- **Other:** Vercel, Streamlit, Matplotlib, Postman, Git

Soft Skills

- Effective Communication, Team Collaboration, Problem Solving, Critical Thinking

Certificates & Badges

- Python Programming – University of Moratuwa
- R Programming for Beginners – Simplilearn
- Introduction to Cloud – AWS Educate
- Fundamental AI Concepts – Microsoft
- Full-Stack Developer – University of Moratuwa
- Getting Started with Storage – AWS Educate
- Foundations of Project Management – University of Moratuwa

Extracurricular Activities

- **Statistics & Computer Science Students Association (2024–2025)** – Junior Treasurer
- **Leo Club of University of Kelaniya (2024–2025)** – Chairperson, Project Aduren Eliyata
- **Rotaract Club of University of Kelaniya (2023–2025)** – Treasurer, Project MediaSpark—Team Member, Project Adaren Waruwak
- **Science Society, Rahula College (2019–2020)** – Class Representative
